neuromuscular imaging springer May 17th, 2020 - springer neuromuscular imaging has increasingly been an important tool in the detection and diagnosis of inherited and acquired neuromuscular disease this book is a groundbreaking radiological and neurological overview of current methods and applications of imaging including aspects of neuroimaging and musculoskeletal imaging in patients with
Osteonecrosis of the Jaw

June 5th, 2020 - Osteonecrosis of the jaw, commonly called ONJ, occurs when the jaw bone is exposed and begins to starve from a lack of blood. Most cases of osteonecrosis of the jaw happen after a dental extraction. Osteo means bone and necrosis means death. As the name indicates, the bone begins to weaken and die with ONJ, which usually but not always causes pain.
